

採水に参加した者（原子力規制庁、I A E A、外務省）
Members of the seawater collection team from NRA, IAEA and MOFA

採水器により表層水を採取
Collecting surface seawater during the mission using a Niskin bottle.

海水の採取後、均一化した後、原子力規制庁の容器と I A E A の容器に分別。
これらの試料は日本、I A E A モナコ海洋環境研究所にて分析予定。
Distribution of seawater samples to NRA containers (left) and IAEA containers (right) after collection and homogenisation. The samples will subsequently be analysed in parallel in Japan and the IAEA Environment Laboratories in Monaco.

採取ポイント M-102 (左)、M-104 (右) での採水
Collection of seawater samples at location M-102 (left) and M-104 (right).

海水の採取後、港にて搬送を準備
Preparations at the port for the transport of NRA and IAEA samples after completion of the mission.
